

Zyvax® SurfaceCleaner

Solvent-Based Mold and Finished Parts Cleaner

©2016 Chem-Trend L.P.

Description

Zyvax® SurfaceCleaner is a combination of solvents specially blended to aid in the preparation of new and used molds and plugs prior to treatment with Zyvax® Mold Conditioners and Release Agents. It readily removes waxes and other surface contaminants without harming or dulling the working surfaces of the mold. For the mold release system best suited to your needs, see our website: www.chemtrend.com.

Zyvax® SurfaceCleaner Benefits

- Can be used to remove all release agents
- No residue
- Ease of application and use
- Fast drying

Uses

Zyvax® SurfaceCleaner provides safe and effective cleaning for molds, equipment and finished parts and will remove uncured resin or gelcoat. Zyvax® SurfaceCleaner will also clean brushes and spray equipment used to apply various release products and elastomeric materials.

How To Use

1. Apply Zyvax® SurfaceCleaner liberally to the surface of the mold with a clean cloth.
2. As the waxes and other contaminants begin to dissolve and loosen, remove them from the surface while still wet using a separate clean cloth or abrasive pad. Make sure entire mold surface is cleaned in this manner, slightly over-lapping the last area if you are working in sections. Be certain that all contours are adequately cleaned.
3. Repeat this process until the entire mold is clean. The cleaning cloths should be regularly replaced as they become saturated with wax, etc.
4. When all the contaminants have been removed, wipe the entire surface with a clean cloth soaked with Zyvax® SurfaceCleaner, and buff until dry.

Storage

The container should be kept closed at all times when not in use to prevent contamination and evaporation. Do not store at temperatures above 100 °F/38 °C. If stored in cold temperatures, allow to warm to room temperature before using. Zyvax® SurfaceCleaner is flammable. Keep away from heat, sparks, flames and combustion sources during storage and use.

Handling

Wear the appropriate personal protective equipment. Apply in a well-ventilated area. For full information, refer to Chem-Trend's Safety Data Sheet.

Packaging

Zyvax® SurfaceCleaner is available in a variety of package sizes. Please contact Chem-Trend customer service for details

Further Information

Request information on our complete range of materials: custom-formulated release agents for polyurethane molding; tire lubes and bladder coatings; Mono-Coat® semi-permanent release coatings; aerosol formulations; mold cleaners and sealers; specialized coatings and application equipment.
