

# TMI 1592-EB

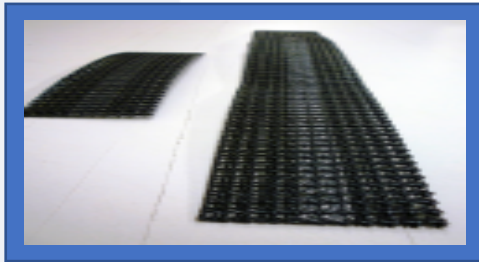

## *PTFE Glass Edge Breather*

### Features:

- TMI 1592-EB is made of a PTFE coated fiberglass 3 ply mesh bonded with PTFE adhesive between layers
- The open mesh construction permits easy air flow and creates a breather path under the vacuum bag to enhance air flow from the breather through the vacuum port to the autoclave hose.
- The coated mesh has a 75% open area and is constructed to provide a rigid ventilating structure ideal for autoclave cures.
- TMI 1592-EB is highly resistant to most chemicals and solvents used in the manufacturing processes for fiber reinforced composites.

### Properties:

Technical Data:	Typical Value:
Maximum use temperature	550°F (288°C)
Open Area	75%
Nominal Thickness	0.100 in (2.5mm)

The above values are "Typical Values" which have a nominal range about them and are not intended for specification purposes.

### Availability:

- Width: 1-3" (25mm-76mm) • Length: Continuous rolls up to 60' (18m)
- Custom cut pieces available by request (minimum may apply).

### Storage:

- Store in original packaging and protect from the environment.

### Health & Safety:

- Handling of these products must conform to individual company guidelines and health and safety regulations.
