

TMI-SHRINK TAPE III

Oriented PVA Thermal Compaction Tape

Description:

- Shrink Tape III is an oriented polyvinyl alcohol thermal compaction tape designed to shrink during heated cure cycle and applies pressure over the surface of composite lay-up or adhesive bond, increasing part consolidation and reducing void content.

Applications

- Shrink Tape III is typically wrapped around a composite cylinder or mandrel, and secured in place with pressure sensitive tape. The assembly is then exposed to heat and begins applying pressure (onset of shrink) at 190°F (88°C) with maximum shrinkage at 300°F (149°C).

Properties:

Technical Data:	Typical Value:
Maximum Shrinkage	<15%
Onset of shrink	190°F (88°C)
Maximum Use Temperature	300°F (149°C)

The above values are "Typical Values" which have a nominal range about them and are not intended for specification purposes.

Availability:

- Standard Roll Width: 1.25" (32mm) and 2.5" (62.5mm)
- Standard Roll Length: 100 yards (91.4 m)
- Custom slit widths and roll lengths available upon request (minimums may apply)

Storage:

- Store in original packaging protected from the environment.

Health & Safety:

- Handling of these products must conform to individual company guidelines and health and safety regulations.
